See The Future of Networked Communications

The new digital ecosystem of AudioVisual (AV) and Experiential Communication solutions has birthed new ways to impress audiences and users. The four walls of a dining room can now project visuals that tell stories about the dishes. Combine AV technologies with automation systems and you can create flipped classrooms, which encourage collaboration. The same technologies can be used in every industry, from public service to retail, to achieve astounding results.

AV & Experiential Communications for Every Industry

This September, get inspired by the endless applications of AV and Experiential Communication solutions at InfoComm India 2017. The world's biggest and forward-thinking brands are poised to showcase their latest solutions. The Summit is where you can become privy to industry trends and learn from experts and fellow industry practitioners. This is also where we have chosen to share our expertise. Visit our booth and explore our latest products and technologies. Discover first-hand how our solutions can help you design digital systems that drive business productivity.
