

# WolfVision Software Solutions

# Bring your own device

WolfVision software components are important options in our **vSolution**: our solution which offers a flexible combination of Visualizer hardware, software, and accessories - supporting more effective communication, collaboration, and knowledge sharing, through advanced but easy-to-use presentation technology.

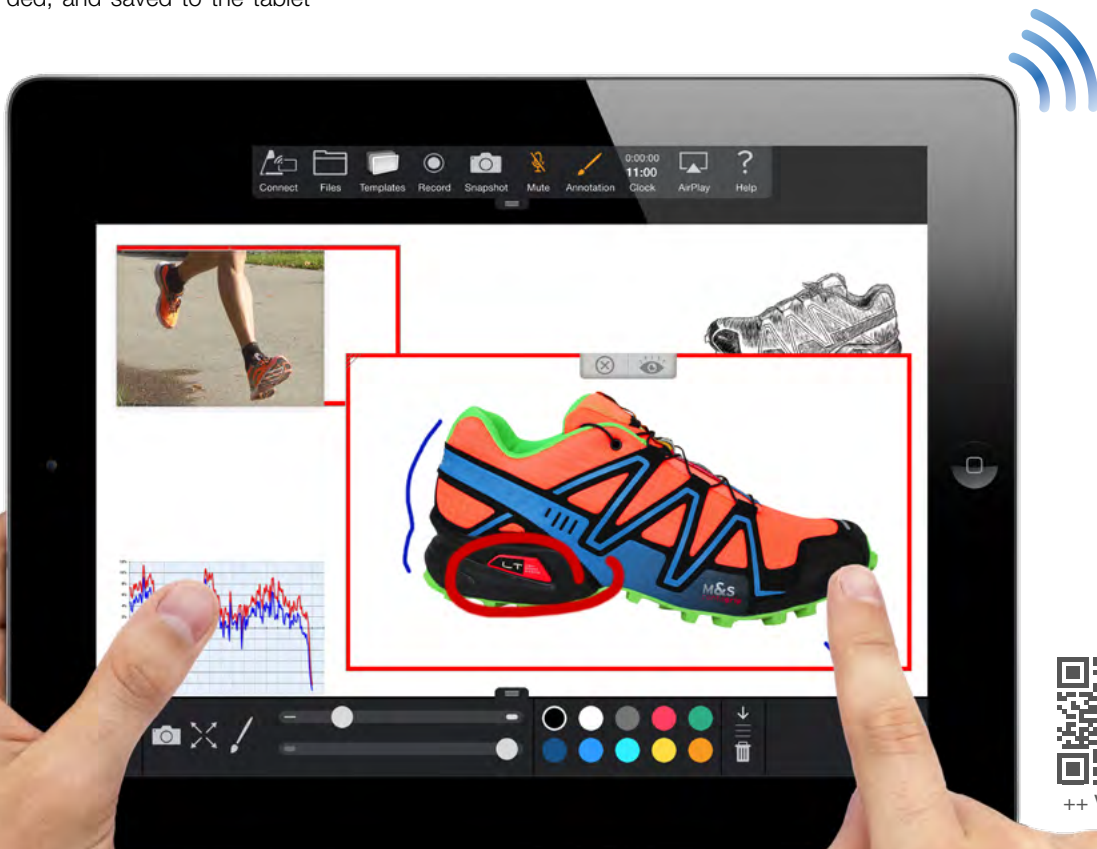

## **vSolution Connect for tablets**

Sync your WolfVision Visualizer with vSolution Connect, our powerful app for iOS and Android with a full multimedia control dashboard. This unique app allows all media types to be integrated and controlled from a single device, where materials stored either locally on the tablet or in Dropbox can be added seamlessly into presentations.

The easy-to-use recording functionality of vSolution Connect also enables entire presentations including any external content, to be recorded, and saved to the tablet

memory. A Live Image preview shows exactly what the audience sees onscreen at all times and wireless connectivity allows presentations or lectures to be delivered from anywhere in the room.

The annotation feature is ideal for making notes, sketching, and highlighting documents, charts, and pictures. A dedicated whiteboard function also provides a separate space for making and displaying notes onscreen during a presentation.

# Transforming presentations

## ✓Solution Control for Smartphones

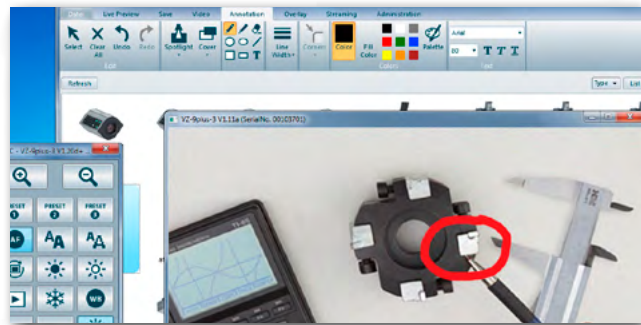

The WolfVision vSolution Control App enables compatible Visualizers and cameras to connect to an iPhone, Windows 8, Windows Phone 8 or Android device via WLAN.

This intuitive and easy to use app allows presenters to use the device keypad to control presentations or lectures wirelessly from anywhere in the room. The big advantage of this app is the provision of a Live Image Preview function.

## ✓Solution Link for PC

vSolution Link enables a user to connect a computer directly to a compatible Visualizer or camera. The software allows for saving, printing and emailing of images, recording of videos, adding annotations and video streaming. It also provides useful tools for automatically applying Visualizer firmware updates, which helps to extend the life of your investment, and allows new features and technical improvements to be added at no cost!
