

**For immediate release:**

## WolfVision introduces Webcasting and Office 365 Feature Packs for Cynap

KLAUS, AUSTRIA – June 07, 2017. WolfVision, the global manufacturer of presentation and collaboration technology solutions is launching new Webcasting and Office 365 Feature Packs for its vSolution Cynap presentation and collaboration system at InfoComm USA 2017. Cynap's multi-functional feature set which already includes a built-in media player, WebRTC web conferencing, on-board recording and streaming, BYOD screen mirroring for all mobile devices, and annotation functionality, will now also offer the option of adding access to Office 365 apps including Skype for Business, plus powerful webcasting capability into its system.

### **Webcasting Feature Pack**

Perfect for both education and business applications, webcasting with the new Cynap feature pack is super easy, and on-screen meeting or lecture content materials can be shared online at the touch of a button, ready for live or on-demand viewing via Wowza, Ustream or YouTube, or for live streaming to Facebook. Audiences of any size can watch the recorded videos anytime, from any location.

### **Office 365 Feature Pack**

The Office 365 Feature Pack incorporates a Skype for Business client into Cynap, together with other popular Office 365 apps such as Word, PowerPoint, Excel, Calendar, and Mail. Files are easy to access, work on, and share with teammates using Cynap, and the built-in Skype for Business web conferencing service ensures that remote colleagues are always easily contactable. **Booth #3801**
