WolfVision Introduces new VZ-8neo+ Visualizer system at ISE 2018

KLAUS, AUSTRIA – January 23, 2018. WolfVision, the Austrian manufacturer of presentation and collaboration technology solutions, announces an extension to its product range of Visualizer systems - the new WolfVision VZ-8neo+ Visualizer will be introduced at this year's ISE 2018 show.

The VZ-8neo+ features a native 1080p HD CMOS camera, 60 frames per second, and a 24x zoom, which picks up objects as large as an open book or as small as a fingernail and enlarge them in full size to fill a display screen. Uniquely, for WolfVision 'Neo' Visualizer systems, the VZ-8neo+ also features an LCD preview monitor incorporated into the camera arm, which makes it easy to position items correctly on the working surface without needing to turn around to check the display monitor.

This Visualizer also comes with an adjustment-free LED lighting system, Power over Ethernet Plus, HDMI In/Out, and intelligent automatic control of all focus, brightness, and white balance settings. Also provided are audio Line In/Line Out, H.264 streaming, and an infrared remote control.

The VZ-8neo+ is designed to be very easy to use, and its true-to-life imaging capability together with exceptional smoothness of motion ensures a distraction-free working and learning experience for presenters, students, and work colleagues alike.

Standard VZ-8neo+ Visualizers are supplied with a working plate, but they are also available to order with WolfVision's popular space-saving 90° 'swivel plate' option instead. This allows the camera arm to be mounted directly onto a desktop or podium, with the option to rotate the camera head through 90° for easy storage.

Stand number #1M20 at ISE 2018

Driving the Creation of Knowledge

WolfVision is a worldwide developer and manufacturer of innovative presentation and collaboration systems. Many internationally renowned universities and other organizations use WolfVision Visualizer and Cynap presentation, collaboration, and knowledge sharing technology solutions, to optimize information handling throughout their organizations.
