WolfVision Debuts New Room Scheduling, Wireless Presentation, & Visualizer Solutions at InfoComm 2019.

WolfVision, the global manufacturer of presentation and collaboration technology solutions, will be introducing three new ground-breaking solutions to the U.S. market at Infocomm 2019; the Cynap Pure, a 4K-capable wireless presentation appliance, vSolution Meeting, an intuitive room-scheduling and meeting management tool, plus the VZ-8.UHD Visualizer, the company's first native 4K UHD Visualizer system. These new systems present ground-breaking, first-of-kind developments for their respective product categories, and expand WolfVision's award-winning portfolio of presentation and collaboration solutions.

Cynap Pure is the first 4K, wireless-only, presentation appliance to enable bi-directional wireless video presentation from computers, tablets and smartphones without the use of apps, dongles or special software. Cynap Pure also supports remote "touchback" control of the presenting PC, and MICE, an advanced integration of Miracast for enterprise-grade network deployments.

vSolution Meeting is a software feature-pack upgrade for Cynap and Cynap Core devices that introduces room-scheduling functionality to the burgeoning product category of all-in-one, networked-AV appliances. Meeting organizers can now seamlessly find and reserve Cynap and Cynap Core-powered meeting spaces when sending out meeting invitations, see room availability upon entering a meeting space, and use their in-room Cynap or Cynap Core to view files that were attached to the meeting invitation.

The new VZ-8.UHD Visualizer combines native 4K UHD output resolution, touchscreen control and preview monitor, plus 4K UHD recording and streaming functionality, together with newly designed optical, mechanical, and electronic systems to deliver a state-of-the-art, easy-to-use, networked-AV ready high performance Visualizer system.

Press

All WolfVision systems and solutions will be on display at InfoComm 2019 on booth #1735, including the latest versions of the Cynap and Cynap Core all-in-one networked AV appliances which now feature Zoom web conferencing integration.

Driving the creation of knowledge

WolfVision is a worldwide developer and manufacturer of innovative presentation and collaboration systems. Many internationally renowned universities and other organizations use WolfVision Visualizer and Cynap presentation, collaboration, and knowledge sharing technology solutions, to optimize information handling throughout their organizations. Committed to 'Driving the creation of knowledge', WolfVision makes continuous investment into research and development, and has won many awards for outstanding innovation and design performance.
