WOLFVISION®

Accessing Cynap systems - Important Notes

To access the Cynap system, some setup information would be helpful for later access. As these information are individual for every setup, please write down basic information of your configuration.
Serial number and model will be found on the type label underneath.

Model		SNo.	
Hostname			
IP LAN 1		MAC LAN 1	
IP LAN 2		MAC LAN 2	
IP WLAN		MAC WLAN	
WLAN Encryption		SSID	
WLAN Password			

availability of LAN 2 depends on model

Authentication

To access the Settings of the Cynap system, the admin password is required.
By default, the web-interface can be accessed without authentication. Additional security can be enabled in the settings - user defineable passwords and a system generated random PIN number.
The default passwords are: "Password" (case sensitive). When you change the password, we recommend to write them down:

In case the user defined administrator password is lost, please contact your WolfVision dealer.
